

David Groves

Healthcare Technology Information Executive

David retired after 38 years in the healthcare industry. He held executive leadership roles in several of America's largest and most innovative healthcare information technology and consulting companies, including McKesson Corporation and Leidos Corporation. He led multi-disciplinary teams focused on the design, development, and delivery of high-quality information technology and management solutions to large hospitals, clinics, and integrated healthcare delivery systems.

While with Leidos, David was the principal consulting executive to the US Centers for Disease Control and Prevention (CDC), for which he built a team of 300 scientists and information technology experts assisting the CDC in developing its capacity to detect and respond to naturally occurring disease outbreaks and intentional threats of bioterrorism.

David now volunteers with International Students Inc., which serves international students at the University of Cincinnati. He earned his bachelor's degree in Industrial and Systems Engineering from the Ohio State University and his master's degree in Business Administration from Kent State University. He is a marathon runner and also enjoys hiking and traveling. He and his wife, Jeri, live near Cincinnati, Ohio.
