

Delores Mincarelli

Data Scientist

In Cincinnati, Ohio, Delores works for TriHealth, which is an integrated full-service, not-for-profit health care system composed of 5 hospitals and more than 130 care sites which provide educational, preventive, and social programs. Through the collection and analysis of complex data, she collaborates with key clinical and management stakeholders to technically support findings and make recommendations for better evidence-based decision-making.

Delores started her career at Procter & Gamble as a manufacturing engineer and manager, followed by a supply-chain management role in which she developed a passion for using data to help predict constraints in material supply systems.

She earned her bachelor's degree in Chemical Engineering from Clarkson University in Potsdam, New York, and has an MS Data Analytics Certificate from Xavier University, Cincinnati, Ohio.

She and her husband have lived in China and Singapore. They enjoy running and biking and love to travel.
