

Donald W. Dlesk Jr.

Aerospace Engineer & CEO

Don is an aerospace engineer with 25 years of experience specializing in stealth technologies and engine propulsion design. He currently leads the design of 3 new unmanned centerline engines, including the recently announced F-143 engine. He designed the industry's first commercial-use Ox-Ox CMC mixer for business jets.

He is the owner and CEO of Viper Works, a specialty shop dedicated to maintaining the Dodge Viper platform, and the co-owner of V10Vault, a trading card and memorabilia company. He actively leads marketing and apparel lines for both the Viper Works and V10Vault brands.

He serves on the national board for the Dodge Viper, acts as the secretary of the Ohio Viper Club, and is a published and recognized professional in both the aerospace and automotive communities.

Don and his wife, Mirna, who is originally from Lebanon, have two daughters. His interests include working out, playing ice hockey, and visiting family in Beirut.
