

Joseph Krisciunas

Technology Coach & Consultant

Joe is a coach and consultant at the intersection of business and technology leadership. He has broad cross-functional experience in product management, product development, research, supply chain, and Six Sigma quality.

For seven years, he served as President of GE Aerospace Electrical Power Systems, a global business designing, delivering, and servicing electrical systems for aircraft. This role concluded a 36-year career with GE, where he had various positions, including Vice President of Engineering and Technology for several business units.

Joe earned a bachelor's degree in Electrical Engineering from Villanova University in Pennsylvania, and a master's degree in Electrical Engineering from Rensselaer Polytechnic Institute in New York.

He and his wife, Diane, live in Cincinnati, Ohio, and have 6 children. Joe is an avid runner and musician.
